

PRESSEMITTEILUNG

SÜDA launches new wet technology series SÜDA Pedospray 2.0

Karlsruhe 05.04.2022: SÜDA offers a wide range of professional solutions for apparative foot care / podiatry in the areas of dry technology, wet technology and compressed air-driven treatment units. Recently, in the area of wet technology devices, the new device series SÜDA Pedospray 2.0 was added.

The advantage of wet technique devices is, that they completely bind the dust produced during foot treatments with a very fine spray, thus providing a beneficial treatment.

The SÜDA Pedospray 2.0 post-technology series consists of a total of six devices based on the latest technology. They can be customized via the six different handpieces and the design is both timeless and modern. The pedicure devices are suitable for beginners, as well as professionals. Furthermore, the new wet technology series offers additional advantages such as individual spray settings, left/right rotation or light for an optimal illumination of the treatment area.

For beginners in the wet technique area or users with less than 5 treatments per day, the devices Pedospray PD 30, Pedospray Pododent 1 and Pedospray PDL 40 are suitable. For user with more than 5 treatments per day, SÜDA recommends the devices Pedospray PX 65, Pedospray PX65L and Pedospray NLX nano, which are equipped with powerful dental handpieces.

"Our new wet technology series SÜDA Pedospray 2.0 offers all chiropodists/podiatrists the right device for their individual treatments. We are pleased to present new innovative solutions in the field of wet technology to support professional treatment on the foot." - Julian La Fontaine, Managing Director IONTO Health & Beauty GmbH.

About IONTO Health & Beauty GmbH

IONTO Health & Beauty GmbH combines the strong brands IONTO-COMED, SÜDA and CARE MORE and offers a wide range of innovative and practical products for wellness, cosmetics and foot care & podiatry - from devices and treatment chairs and tables to consumables and complete cabin equipment.
